

### Aesthetic Beauty

All procedures are carried out by Jodie Grove, Advanced Aesthetic Nurse Prescriber, director of The Grove Skin Clinic and member of the British Association of Cosmetic Nurses

### Anti-wrinkle injections

*Anti-wrinkle injections are commonly referred to as Botox, short for Botulinum Toxin: a naturally occurring purified protein that is injected into facial areas targeted for rejuvenation. Muscles in the face contract and, over time, this causes wrinkles and lines to form. These injections temporarily stop these muscles from contracting, resulting in a refreshed appearance*
